For Immediate Release:

March 13, 2010

Flash4 Introduces a complete Line of Ink Jet and Laser Sheeted Labels to its Product Offerings.

Flash4 has successfully manufactured thermal transfer and direct thermal labels for resellers since 1998 and has steadily increased revenue over the years by offering competitive pricing and quality products. Flash4 continues to add equipment and capabilities in order to keep their resellers competitive in the current market.

“Our resellers have requested Flash4 to add competitively priced Laser and Ink Jet Labels to our product offerings for years,” states Flash4 President Dino Valentino. We currently will be offering standard matt white face sheets with permanent and removable adhesives. Additional face sheets also available will include fluorescents, recycled materials, photo gloss and also clear ink jet and laser materials.

Inkjet printing has brought full color printing to the desktops of millions of offices. The print quality of some inkjet printers can rival a professionally developed photo. There is no doubt inkjet printing, when combined with photo quality inkjet paper can be simply stunning.

Flash4 is excited about providing Ink Jet and Laser labels to its customers. Our sheeted products are compatible with most popular software programs.

More information about Flash4, its history and products is available on the Internet at www.Flash4.com or by calling 1-877-335-2744 (USA and Canada).
